

The Future is Here!

Spas with WIFI capabilities are the future, and Simply Spas are pleased to announce that most of our spas are now WIFI ready!

For a modest €499 you can add the WIFI module and activate the WIFI feature. By downloading an app to your phone or mobile device, you can control the function of the spa from anywhere!

Imagine treating your phone as a remote control and being able to control the spa functions while away from home. Whether at work, on vacation or simply sitting on the living room sofa you can check the temperature of your spa as well as many other functions and settings.

Downloading the app is **easy!**
